

# Customized Handsets . . .

We customize to meet your needs (minimum quantities may apply):

Branding - Standard units are furnished blank. Custom marking is available.

Coiled cords - Custom lengths, colors and construction are available in addition to our standard 4 and 6 conductor coiled cords.

Armored Cables - Standard 32" models trimmed as required. Custom lengths, color code and construction available.

Plugs and Jacks - A variety of plugs or jacks are available for standard and custom applications.

Microphones - Carbon, carbon equivalent, electret or dynamic microphones are used for standard configurations. Also available are carbon equivalent and electret noise canceling or dynamic close talking elements where increased clarity is required.

Earphones - A wide range of earphone elements with various impedances and special features are available.

Switches - Handsets can be supplied with switches wired for Push-to-Talk (PTT), Push-to-Mute (PTM), and Push-to-Key an external circuit (PTK) operation.

Volume Control - Handsets can be provided with internal circuitry that allows the user to alter the earphone volume level of the handset. Volume adjustment is accomplished by switches, rotary volume knobs, or slider switches (depending on application and handset model type.)
