

# Handset Cradle Assemblies . . .

Handset Cradle Assemblies Wired for Telecommunications & Two-Way Radios

## Applications:

- Call Boxes
- Law Enforcement Vehicles
- Emergency Response Vehicles
- Building Security
- Ambulances
- Hospitals
- Trains
- Schools
- Buses
- Airports
- Hospitality

Fully assembled "G" Style PTT handset with a bulkhead-mount cradle assembly. Cradles can be supplied with mechanical leaf or magnetic reed switches. A variety of cables and connectors are available to interface with your equipment.

## Options include:

- Attenuation circuit to lower the handset audio when used with an external speaker.
- Covert microphone which allows sounds in a vehicle or room to be monitored remotely while the handset is on hook, for security and safety purposes.
- Toggle switch allows for external speaker to remain on while the handset is in use.
- External Speaker

Handset Cradles
