Handset Cradle Assemblies... with Speaker

Armored Cable

Unibody Handset Cradle Assemblies provide a streamlined appearance, rugged construction, magnetic hook switches, improved environmental sealing, and can be manufactured to meet the requirements of IP66. Audiosears can customize the Unibody for your specific application.

Options Include:

- Water and dust resistant.
- IP66 configured – Coiled Cord version only.
- Armored Cable or Coiled Cord.
- Covert Microphone Function which allows sounds in a vehicle or room to be monitored remotely while the handset is on hook, for security purposes.
- Toggle switch allows for external speaker to remain on while the handset is in use.
- Adjustable volume.
- Metal speaker grill.
- Custom circuitry.
- Cables and connectors.

APPLICATIONS:

- Buses
- Ambulances
- Law Enforcement Vehicles
- Fire Trucks
- Emergency Response Vehicles
- Call Boxes
- Building Security
- Trains
- Airports
- Transportation
